

Getting GPS Readings for your Holding

1. Using internet and Google Maps

1.1 go to www.maps.google.com

Search for an address here

Click here if you want to see a satellite view

Click and drag or zoom to find your location

1.2 Right Click and choose the "What's here" option

1.3 You'll see the GPS reading at the bottom center of your screen

1.4 Put those into the permit application

2. Using your iPhone

2.1 Go to the 'Maps' application

2.2 Scroll to the holding location and give a long key press

2.3 Scroll down in the "Marked location" section and the GPS readings (Latitude and Longitude) will be shown

3. Using your Android phone

3.1 Download the "Google Maps" application if you don't already have it

3.2 Scroll to the holding location and give a long key press

3.3 Pull up the "Dropped pin" section

3.4 Click share button and choose your messaging app

3.5 You'll either see the GPS reading as in 1 and 2 above

OR

put the URL you see in the GPS location box in your application which should look something LIKE

"https://goo.gl/maps/AkBa6y3tD8L2"

!!you might get lucky and see the GPS reading come up in the search bar!!
